Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Art Unit: 3727

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-17 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim 1 states that the second container portion doesn't have a shoulder or neck at the top of the second container portion. This was never stated in the written specification or claims of the originally filed application. The drawings disclose that the second container portion has a neck portion insofar as the top open end edge terminates with an upwardly extending vertical wall that forms a neck. Claim 15 is similarly indefinite.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "the second container" in line 6. There is insufficient antecedent basis for this limitation in the claim because only a (first) container has been introduced in the preamble and the first container has first and second portions. It can't be

Art Unit: 3727

determined if another container is being claimed or if the second portion is being referred to.

Claim 15 is similarly indefinite.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, 8 and 11-16 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Blecher.

Claims 1-4, 12-15 and 17 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Rosenblatt.

Claims 1-3, 5, 6, 11-13 and 15-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Levy et al. (Levy).

Levy discloses a perfume bottle container comprising a first portion (outer portion) with a shoulder and neck at the top when rotated 90 degrees clockwise from the orientation shown on the front page, a second portion (inner portion)(there is no shoulder or neck at the top of the second portion) and a connecting portion (horizontal wall connecting first and second portion).

Claims 1-3, 5-7, 9, 12-15 and 17 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Chang.

Claims 1, 3, 5, 6, 11 and 12 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Mayer.

Claims 1, 4-6 and 12 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Grady.

Claims 1, 4-6 and 11-17 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Cambio, Jr. (Cambio).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schiemann in view of Grady and Cambio.

Schiemann discloses a first container portion 12, a second container portion 13 and a connecting portion 18. Schiemann discloses the invention except for the absence of a neck or shoulder on the top of the second portion. Grady teaches a first portion 101 and a second portion 114 with no shoulder or neck with a cylindrical portion which is similarly constructed as the top of the second portion of the invention. It would have been obvious to modify Schiemann to include another compartment or to modify the second compartment to be a tool compartment as Schiemann includes means for storing tools. This modified or additional compartment would have no shoulder or no neck as the teachings of Grady provide that tool storage without neck or shoulder.

Re claims 2 and 3, Cambio shows the inwardly directed depressions.
